FIRE ALARM TELEGRAPH.

JOHN F. KENNARD, SUPERINTENDENT. Salary $3000., with use of horse and vehicle, Office, City Hall.

[Chosen by concurrent vote.]

[He has also the care of all the Public Bells and Clocks.]

Operators, Charles A. Stearns, Cyrus A. George, Granville S. Mendell, Chas. M. Chaplin. Salary, $5 per day. *Repairers*, George S. Thom, Adam McAfee, Uzziel Putnam, William H. Godfrey. Salary, $5 per day. *General Assistant*, Benj. F. Burchsted. $4.50 per day.

A constant watch is kept at the office, City Hall, night and day, by the operators. Each operator serves two alternate terms, of three hours each, as principal, and the same as assistant operator; so that twelve hours' service at the office, out of every twenty-four, is required from each operator. No operator is permitted to sleep during his watch, unless expressly relieved by some one else, and by consent of the Superintendent.

Each operator is accountable to the Superintendent for any mistakes that may occur at the office during his hours of duty.

An accurate account is kept of the time of giving each alarm, and of the station from which it originates, and all other necessary information.

Alarms are transmitted to the Central Office, from the Signal Stations or Boxes, by pulling a slide in the Box. The police officers, and one other person resident near each station, have keys to the Boxes.

The ringing of the bells and the tapping of the Boxes, *each* denotes the number of the Station from which the alarm originated: thus,—one blow, a pause, three blows, another pause, and two blows (1—3—2) indicates that the alarm came from Box No. 132. Second alarms are sounded by striking ten blows. Third alarms are sounded by striking twelve blows twice; if the entire department is wanted, alarms are sounded by striking twelve blows three times.

Alarms are usually given in about half a minute from the time the Box is operated.

Directions to those who hold Signal-Keys.—If a fire is discovered in your vicinity, go to the nearest Box. Pull the slide all the way down once, and let go; wait at the Box, and direct the firemen to the fire. If you hear no reply on the bells, pull again; if no reply, go to the nearest Box. *Cautions.*—1. Be sure there is a fire before sounding the alarm. 2. Never sound the alarm for a fire seen at a distance. 3. Never open the Box except in case of fire. 4. Be sure your Box is locked before leaving it. 5. Never let the key go out of your possession unless called for by some responsible person to give an alarm. 6. If you remove from your house or place of business, return the key to the Fire Alarm Office. Don't leave it with the new tenant.

Dwelling-Houses.

SECT. 27. The following rates shall be charged annually for the use of the Cochituate water:—

Every dwelling-house, including the land under, and used in connection with, the same, shall be charged, when they are valued for the assessment of taxes at $1,000, or any less sum, and occupied by one family only, *six dollars;* and for every additional $1,000, or fractional part thereof, *one dollar*, until the valuation for the assessment of taxes shall amount to $25,000; and for every family more than one in a dwelling-house, the charge shall be for each *two dollars*.

In addition to the foregoing rates, there shall be charged to each dwelling-house with one family, in which a water-closet or bathing-tub is used, or in which both are used, *five dollars*; and for each family more than one, the charge shall be for each *two dollars* annually.

Tenement-Houses.

SECT. 28. For the use of Cochituate water in model or tenement houses, which are rented in suits of rooms to different families, the rate of charge for each such tenement shall be based upon the rental of such tenement, viz: Every tenement occupied, and having a faucet within the same, shall be charged *three dollars* annually, and *fifty cents* additional on every one hundred dollars, or fraction of one hundred dollars, rent above three hundred dollars; *provided*, that the said rate may be based upon the estimated yearly rentable value of each such tenement. In addition to the foregoing rate, there shall be charged to each tenement in which a water-closet or bathing-tub is used, *three dollars*, or in which both are used, the sum of *five dollars* annually.

Each tenement in which there are no water fixtures, the occupants taking the water from taps in common with other tenants of the house, shall be charged *two dollars* annually; and an additional charge of *two dollars* annually shall be made to each tenement the occupants of which use a water-closet in common with other tenants.

And in addition to these rates there shall be charged for each water-closet within the office or tenement, *three dollars* annually; and, when the water-closet is located so as to be used in common, the charge for each office or tenement shall be *two dollars*.

Hotels and Boarding-Houses.

SECT. 30. Hotels, taverns, and boarding-house (said boarding-houses being valued for the assessment of taxes over $15,000), not including water for baths or for uses without the house, shall be charged, for each bed for boarders and lodgers within the same, *three dollars; provided*, that in no case shall any hotel, tavern or boarding house be charged less than if occupied as a private dwelling-house.

Stores and Shops.

SECT. 31. Each tenement occupied as a store, warehouse, office, shop, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water, shall be charged from *six* to *twenty-five dollars*. For each water-closet more than one, supplied for the above, there shall be charged *five dollars* additional. SECT. 33. There shall be charged for the right to attach a hose, of not more than five-eighths of an inch orifice, for washing windows or sprinkling streets, in addition to the charge for other uses, *five dollars*, and for corner lots, *ten dollars*. But no hose shall be attached, or used in any stable, for washing horses or carriages, or for any other purpose whatever, except for extinguishing fires.

Eating-Houses.

SECT. 34. Refectories, confectioneries, eating-houses, market and fish stalls, provision shops, refreshment and oyster saloons, according to the quanity of water used, shall be charged from *eight* to *fifty dollars*.

SECT. 37. Stationery steam-engines, working not over twelve hours a day, shall be charged by the horse-power, as follows: For each horse-power up to and not exceeding ten, the sum of *ten dollars;* for each exceeding ten, and not over fifteen, the sum of *eight dollars;* for each horse-power over fifteen, the sum of *six dollars*.

SECT. 42. Manufacturers and other parties, supplied with water through meters or by estimated quantity, shall be charged at the rate of *three cents per one hundred gallons*.

SECT. 43. When water is required for purposes which are not specified in the foregoing tariff, the rate shall be fixed by the Cochituate Water Board.

SECT. 44. Whenever two or more dwelling-houses, or other estates, are valued together for the assessment of taxes, it shall be the duty of the Water Registrar, under the direction of the Cochituate Water Board, to make a seperate valuation of the same; and whenever a portion only of any estate is justly chargeable for any water rate, it shall be the duty of the Water Registrar to make a proper valuation of the said portion; and the water rates hereinbefore provided shall apply to such valuations respectively.

Meters.

SECT. 45. When large quantities of water are required, as in the case of railroads, hotels, manufacturing and other establishments, the Cochituate Water Board shall have power to ascertain by meters the amount of water used; and the proprietors or occupants of hotels, taverns, boarding-houses, or any other establishment using large quantities of water, shall also have authority to place within their premises, at their own expense a sufficient water-meter, to be approved by the Water Registrar, for the purpose of measuring the quantity of water by them repectively used. The charge for the use of water by meter shall be *three cents for one hundred gallons*, to be collected quarterly by the Water Registrar; and all such bills shall be paid within ten days thereafter, or the Water Registrar shall cut off the supply after sending a summons as provided in Section 15.

Non-Payment.

SECT. 15. In all cases of non-payment of the water rent for sixty days after the same is due, the Water Registrar shall serve a summons at the premises of such delinquent; and unless said rent is paid within three days thereafter, together, with twenty-five cents for said summons, the Water Registrar shall cut off the supply; and the water shall not be let on until the amount due, together with the twenty-five cents for said summons, and two dollars for the shutting off and letting on, is paid; *provided*, that no occupant shall be required to pay the amount due from a former occupant; and *provided*, also, that in cases of specific supplies, or for fractional parts of the year, when the water has been let on the summons may be served, and the water cut off immediately; and it shall not be let on again except upon the conditions before mentioned. The foregoing provisions shall apply when two or more parties take water through the same service-pipes, although one or more may have paid the proportion due from him or them.

SECT. 26. No hose shall be attached or used in any stable for washing horses or carriages, or for any other purpose whatsoever, except for extinguishing fires, under a penalty of ten dollars for each offence; and, if this penalty shall be incurred and not be paid within two days after demand for the same shall have been made at such stable, the water shall be cut off from such stable, and shall not be let on again until said penalty shall be paid, and also the additional sum of two dollars for cutting off and letting on the water.

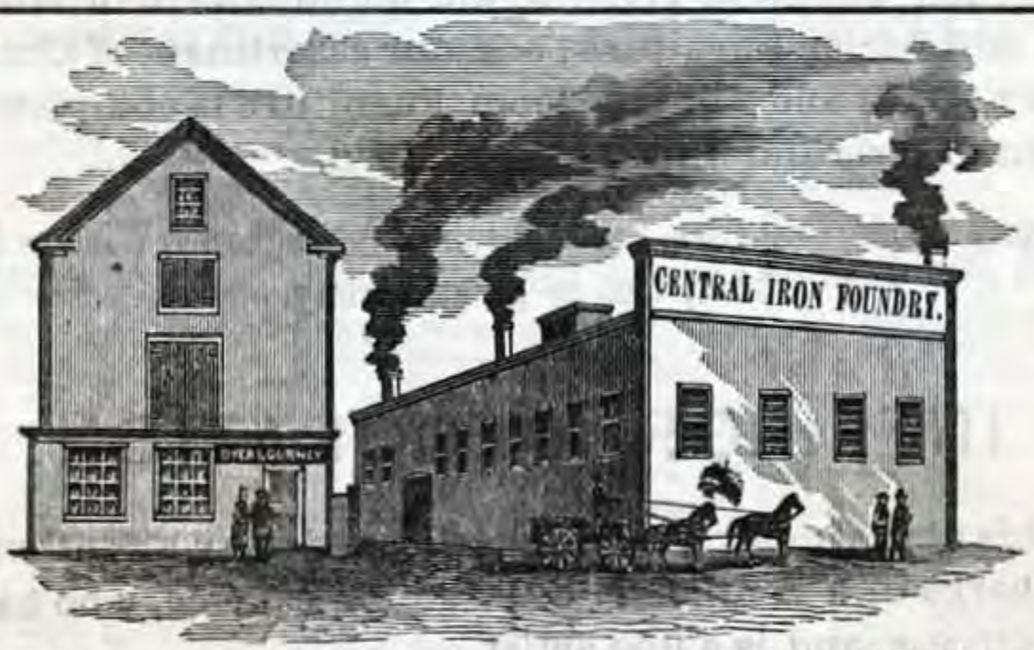
BURGLAR AND FIRE-PROOF SAFES,

Steel Vaults and Combination Bank Vaults.



Manufacturers of McFARLAND'S Patent BANK VAULTS and IRON SAFES of Improved Patterns.

From the Official Report of the Judge at the Eleventh Exhibition of the Massachusetts Charitable Mechanics' Association.

BURGLAR-PROOF SAFE.—In his efforts to produce a Burglar-Proof Safe, the inventor has evidently made a long stride in the right direction. This safe is no copy of those in general use, but is quite original; the outer shell or frame (with well-rounded corners) being one continuous band of iron and steel welded together at the ends; the front and back being secured to this shell in a remarkably strong and ingenious manner. All the bolting is done from the inside, and the points of the steel bolts are hardened.

Taken as a whole, it is the most formidable obstacle ever placed between the "burglar" and his coveted treasure. We recommend the award of a gold medal.

"**1503.** CODMAN & SHURTLEFF, Boston, Mass. One Case Surgical Instruments and Atomizers.

"The Committee have no hesitation in awarding for this superb exhibition the highest premium. * * * The various other instruments for inhalation of Atomized Liquids, and for Local Anæsthesia, were all apparently faultless, both in design and workmanship. The exhibiters are regarded as more especially deserving of the highest token of merit for having produced nothing except of their own manufacture. GOLD MEDAL.

(Signed) GILMAN KIMBALL, M.D., Chairman."

Exclusive attention to OFFICE MEDICAL PRACTICE, and the Teaching of his Original Method of Promoting to an Extraordinary Degree, Health, Strength, and Development.

OFFICE AND GYMNASIUM,

Open from 8 1-2 A.M. to 7 P.M.

Graduated Yoke-Lifter—the most strengthening and health-promoting of all exercises—is practised in no other establishment in this city. It is a process which brings into harmonious action at one effort upwards of four hundred muscles; arousing every dormant function of the body, and imparting cheerfulness to the mind. It enables business men, whose time is precious, to get most of the needed exercise of a day in a few moments. It is a safe and reliable means of making the weak strong, and the strong Herculean; **doubling the strength in three months, and trebling it in a year.** As strength is the correlative of health, the importance of such a result in a hygienic point of view, is beyond question. It is an invaluable aid to medicine in the treatment of asthma, dyspepsia, obesity, pulmonary diseases (first stage) chronic rheumatism, neuralgia, torpor of liver and bowels, and "general debility." HANDLE-LIFTING. (three kinds — Dead Weight, Lever, and Spring.) HAND-SHOVING or CHEST-EXPANDING, FOOT-SHOVING or LEG-DEVELOPING, ROWING, and all other essential exercises of a regular Gymnasium are also practised by DR. WINDSHIP'S patients and pupils.

☞ Patent GYMNASTIC APPARATUS constantly for sale, including "The Practical Graduating Dumb-bell," adjustable in a moment to any half-pound graduation of a regular series between 8 pounds and 101; "The Atmospheric Lifter," very compact and portable, and providing for either handle or yoke-lifting; and "The Complete Developer," or **Concentrated Gymnasium.** This last contrivance occupies a space of only 8 feet by 4, involves in its use yoke lifting, hand-shoving, and rowing, and would prove especially useful in any Medical Office, Hospital, or Academy.

H. R. TAYLOR,

CABINET-MAKER,

1908 WASHINGTON STREET,

MANUFACTURER OF

TAYLOR'S PATENT SELF-SUPPORTING DRAWER,

So arranged as to be drawn out to its fullest extent, and to support itself in that position; it being impossible for it to fall; and yet capable of being removed from the case and replaced with the same facility as a common drawer. There is none of that disagreeable side motion and sticking of the drawer, nor is it necessary to exert one's utmost strength to pull it out or put it in. It is peculiarly adapted for tellers' drawers, money-drawers, &c.

Its advantages are perceptible at a glance; and the necessity of such an improvement warrants for it success. It has already been introduced into many public buildings and private houses, and has everywhere given complete satisfaction. Persons desirous of seeing specimens of work are invited to call at his manufactory, No. 1908 Washington Street.

TAYLOR'S PATENT CRIB and CRADLE constantly on hand and for sale. WINDOW SHADES of every description furnished at the shortest notice.

Patented April 27th, 1858, and Feb. 20th, 1860. The attention of Architects, Bank Officers, Hardware dealers, manufacturers of drawer work, and the public generally, is respectfully solicited. All communications addressed to the subscriber will receive prompt attention. **PATENT RIGHTS FOR SALE.**

E. D. SPEAR, M.D.,

The Old Indian Doctor,

So much celebrated for his remarkable cures.

713 Washington Street, Boston.

Dr. Spear may be consulted upon ALL diseases.

Dr. Spear has issued a small work, in which he says: In preparing the Medical Hand-book for the afflicted and the public at large, which is designed to take the place of the more bulky "Family Physician," the author and publisher has several objects in view. The first was, to bring it into a more portable size, by eliminating a large amount of reading matter, and omitting many testimonials received in his earlier practice, thus meeting the demand of this fast and busy age, when few can stop and read long homilies on any subject. But the principal and most important object was, to bring to the notice of the public a sample, at least, of the great mass of certificates and testimonials he has received within the last few years, and is now constantly receiving. To these he bespeaks the careful attentionof the reader: and he refers to them in no boasting spirit, but simply as evidence that his study and effort to relieve suffering humanity have met with gratifying success. In this regard he can cheerfully submit his claims as a successful physician to that truest and most sacred of all tests, "By their fruits shall ye know them."

It may be thought by many hardly necessary to say, after communicating with the public so often and for so long a time, that his treatment of disease is peculiar to himself; but for the benefit of those just coming upon the stage of action it may very properly be dwelt upon for a moment. Suffice it to say, in brief, that he has discarded many of the crude and absurd notions that obtained among practitioners of past ages, and clung to by many with surprising tenacity at the present day; and after careful study and diligent research into the various systems of practice, has adopted a system which has common sense combined with science as its basis. Upon this sure foundation, by the full use of his reason and judgment, he has drawn from Nature those pure and safe remedies, which, though all-powerful in removing disease and bringing to the patient joyous and gladsome health, leave no lifelong sting behind. To the sick therefore, he feels authorized to speak words of encouragement and hope.

As will be seen by reading the testimonials, many who were near the gates of death, and given up as lost, have been rescued by his hand and restored to health. Others who are now suffering, with little hope of relief, he believes may also be made to enjoy the rich blessings of health. The afflicted, then, of whatever nature, he invites to his office —

BUERK'S

Watchman's Time Detector.

THIS **WATCH-CLOCK** was introduced to the public in almost every section of the United States and Canadas, about twelve years ago; and it has proved itself to be the best invention in the world for testing the faithfulness of the watchmen. Since its introduction, the proprietor has improved on some parts, and corrected deficiencies which have been suggested by using it; and he has now a perfect check upon the Watchman. With other clocks a regular routine has to be followed; but with this, a Watchman can be ordered to visit any particular place as often as required, without being compelled to go to places where it is not necessary to visit as often.

The instrument is complete in itself, portable, and as reliable as the best lever watch.

It is not so likely to become disarranged in its works as a good watch, because its parts are stronger; but, when it needs cleaning, any common watchmaker can adjust it, its mechanism being simple.

It requires no fixtures or wires communicating from room to room, as is the case with the ordinary Watch-Clocks; a small, inexpensive, stationary key is alone required at each station.

Its use is not restricted to a single building; and places can be guarded that it would be impossible to guard with any other instrument, such as Railroad Tunnels, Bridges, Yards, Shops, &c.

The instrument will, in all cases, be warranted perfect and satisfactory. Its price is invariably

Seventy-Five Dollars, Cash on Delivery,

Including as many Keys as are requisite, not exceeding twelve.

This Watch-Clock is sold at a less price than any other in the market.

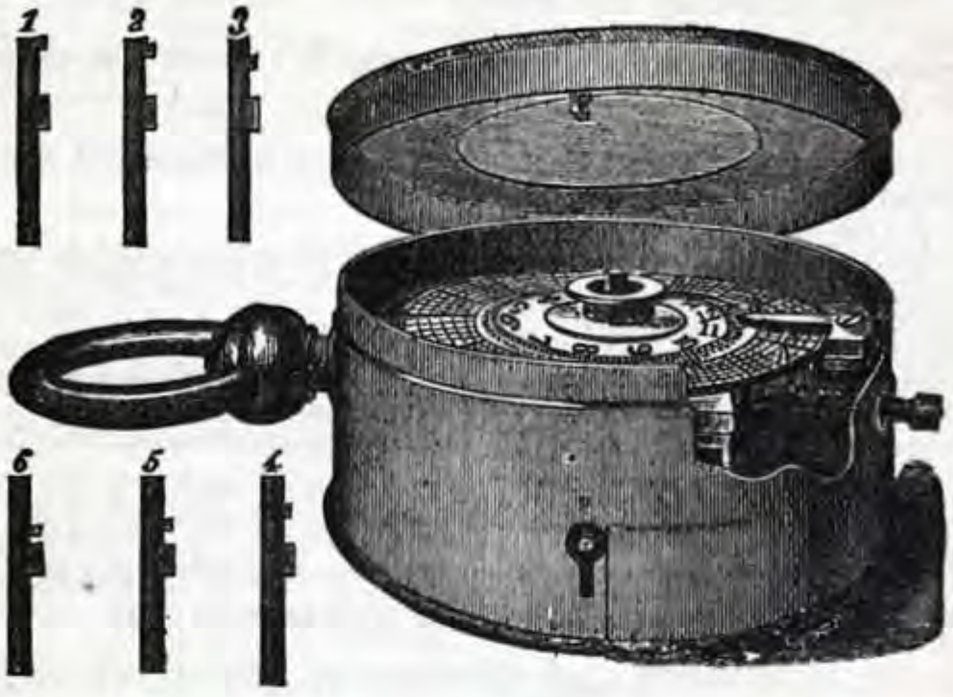
The DETECTOR is used extensively by large Manufacturing Establishments and Railroad Companies in the United States, from whom numerous testimonials have been received.

N. B.—Parties purchasing these Clocks should test them sufficiently in the counting-room or office, as they will not be taken back after having been injured by the Watchman through carelessness.

All communications promptly attended to.

ADDRESS:

J. E. BUERK, Proprietor,



84 WASHINGTON ST., Room 6, BOSTON.

P. O. BOX, No. 1057.

N. B.—It is very essential to carry the clock secure, taking care that it is not brought in contact with any hard substance, and thereby broken. I have on hand POUCHES, with straps, to go over the shoulder and around the body, which I will send with the Clock, if ordered. Price, $2.50.

This DETECTOR is covered by two U. S. Patents. Parties using or selling these instruments without authority from me will be dealt with according to law.

Buerk's Watchman's Time Detector.

All large corporations or manufacturing concerns employ Watchmen, who look to the safety of the several buildings, and are expected to be vigilant in guarding the interests committed to their charge. Property of immense value is thus at the mercy, so to speak, of one man; for, if he is neglectful of his duty, he is not only dishonest, but jeopardizes the daily bread of numberless persons who may have funds invested in the concern.

To hire one Watchman to look after the other would not be a very wise proceeding; for, by collusion, they might set at naught all such precautions. Recourse is therefore had to machinery,—silent, insensate wheels and springs. By the judicious combination of these, tales can be told which result in the dismissal of the untrustworthy servant, or his retention and reward if found worthy.

The above engraving is a view of a Time Detector, which is carried about by the watchman to all the different stations to be guarded. At each station is a small key, securely fastened to prevent his taking it with him. The watchman goes from station to station, takes the key fastened there, inserts it into the clock, gives it one turn, and goes on to the next, or to any other, station, for he is not bound to go in regular order. By this, it follows that a perfect record will be kept of each operation.

The broken-out portion of the watch shows the mechanism which operates the pin which pricks the paper. At A, there is a number of sliding bars which connect with the pricking points, so that, by turning round the key, the ward on it strikes a certain bar, and penetrates the dial paper B. By that act a small hole is made in the paper, which tells what time the man appeared at each station; how often he came there; how long he stopped; how long it took him to go from one to another; whether he went in regular order or not; in short, it gives a complete record of his night's work.

The small figures are views of different keys. A flange on the side of the key prevents it from being turned unless it is inserted quite into its place; so that the key used for one station cannot be used to make a mark for a key at another, nor, indeed, can any key except a perfect duplicate be made to do it. Any attempt on the part of the watchman to evade his duty by counterfeiting keys may be effectually baffled by occasionally changing keys from one station to another. An indefinite number of stations can be served.

The watch is wound, set, and closed each evening by the proprietor or superintendent, and the box locked with a key which he keeps, so that the register within is unseen by, and out of the reach of the watchman who carries it. In the morning when the Detector is returned to the superintendent, the graduated disc of paper may be removed from its position, and filed, like a telegraph despatch, as a permanent record, while a new disc is applied for succeeding records.

WASHINGTON
Life Insurance Co.

OF NEW YORK.

CHARTERED . . . . . 1860.

Cash Assets Exceed $3,500,000.

Annual Cash Dividends to Policy-Holders.

Policies and Dividends protected from Forfeiture.

The entire Profits are equitably divided among the Policy-Holders annually. Dividends are never forfeited (a feature peculiar to this Company), but may be paid to the Policy-Holder in Cash, or applied to increase the amount insured, from and after the Second Annual Payment, at the option of the holder.

It is the only Company which applies its dividends to hold good a policy which otherwise would be null and void from non-payment of Premium. If a Policy which has a dividend credited upon it lapses from non-payment of Premium, the Company will hold the Policy good for such proportion of a year (or years) as the Dividend bears to the annual Premium. For instance, a man paying a Premium of $365 annually on a Life-Policy of $10,000, and having Dividends of $288 standing to his credit, would be held insured for $10,000 for 288 days (9 months 18 days), after failing to pay his Premium! In some cases, the accumulated Dividends would keep a Policy in force several years.

VOICE-BUILDING.

This is a new and verified Theory for the Mechanical Formation of the Voice.

Its principles are simple and definite; and, when it is reduced to practice, it is certain in its results. It restores debilitated throats, and so forms the voice as to completely protect the organs from injury, and prepare them for the discipline of Elocution.

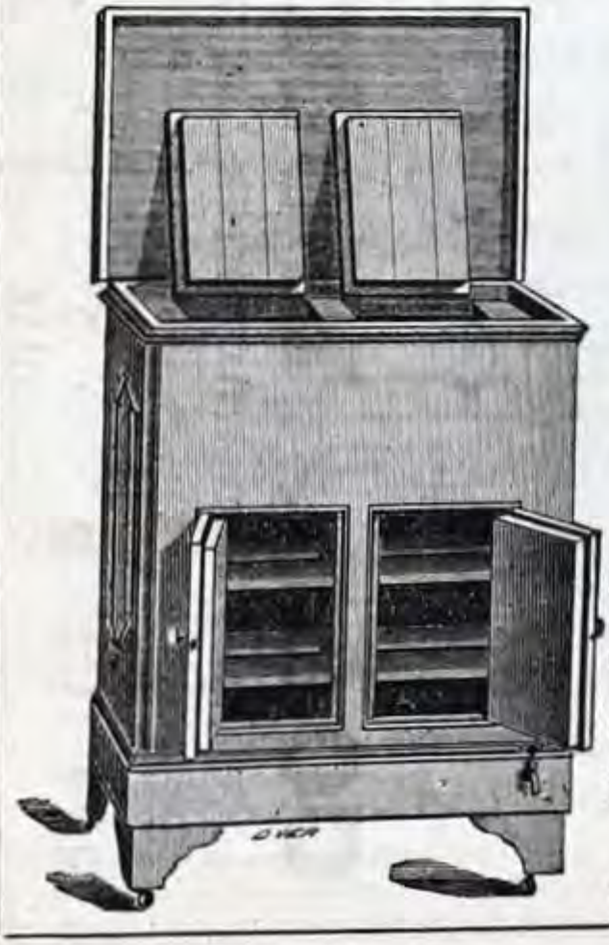
No. 1.

No. 2.

206 West Street, NEW YORK.

The following is one of the many Testimonials of the merits of these superior Grates, now in use in 10,000 different furnaces in the country: —

Naumkeag Steam Cotton Company,
SALEM, MASS., Oct. 29, 1870.



Messrs. W. W. TUPPER & Co., New York.

Gentlemen: — In reply to your inquiries, I can say, that, after an experience of two and one-half years with your Grate Bars, I am satisfied that they are superior to any bars that I have ever tested, for the following reasons: viz., economy of fuel; retaining their original form and position longer; the air impinges upon the cross sections of the bars, producing more equal distribution, which is an essential point, and affords material comfort in the management of the fires. We have not used them long enough to determine their durability; but I have no doubts on this point. Respectfully yours, JOHN KILBURN, Agent.

ADDRESS,

BRILLIANT POLISH CO.

P.O. Box 1292, - - - - BOSTON, MASS.

Testimonials of the Brilliant Polish.

From Messrs. GUILD & DELANO, Jewellers, 2 Winter St., Boston.

We have used the BRILLIANT POLISH, and from our experience should think it one of the best articles in the market for general use, and adapted to a wider range of uses than any other polishing material we know of. Its fine grain gives a high polish upon metals, while upon glass it leaves a brilliant lustre.

From Mr. B. W. HOBART, Station Agent, Boston and Albany Railroad.

The POLISH has long been used in cleansing the Car Windows, Mirrors, Silver-Plated Trimmings, etc., on the Boston and Albany Railroad, and is an excellent and unequalled article for the purpose.

From Mr. ASA RICE, in charge of Boston and New York Sleeping Cars.

I have used more than one hundred Boxes of your celebrated POLISH, and can recommend it in the highest terms for every thing you advertise it for. I have used a great many different kinds of Polish; this Polish excels all others.

Having sold the BRILLIANT POLISH to our customers, we certify to its satisfactory and superior qualities as a Polish for Metals, Glass, &c., and we regard it as unequalled in its line of utility.

FIGHTING FIRE.

FIFTEEN YEARS' EXPERIENCE

(See next page.)

The Late Terrible Conflagration

IN BOSTON,

following so closely in the wake of the no less lamentable disaster to

CHICAGO,

has aroused in the mind of every thinking citizen the questions,

How can we most effectually protect our property when danger threatens? and how best battle with the Fire Fiend when once he has obtained a foothold?

Saying nothing here of the many and various forms of "FIRE EXTINGUISHERS," which rely partially or entirely for their efficiency upon chemical action, many of which are undoubtedly most excellent, it must be allowed that upon the use of water, and

THE USE OF WATER ALONE,

is to be based the hope of subduing ANY CONSIDERABLE CONFLAGRATION.

To this end much of the best engineering skill of the country has been turned, looking to the perfection of FIRE EXTINGUISHING APPARATUS; and it has now reached such a degree of completeness, that our Fire Departments are an honor to our cities, and the pride of every country village.

The Firm issuing this circular having had an

EXPERIENCE OF NEARLY FIFTEEN YEARS

in building of machinery in this particular line, and having spared neither labor nor expense in bringing it to

THE VERY HIGHEST STATE OF PERFECTION,

and claiming to-day to STAND UNRIVALLED in the variety and perfection of their work, wish to call the attention of the large number of our citizens interested in this matter of PROTECTION AGAINST FIRE to some of their special apparatus for the purpose, being assured, that, where it is properly erected and operated,

A GREAT CONFLAGRATION IS IMPOSSIBLE.

On page 1305 is a representation of a section of a high city building, in which is placed one of the styles of FIRE APPARATUS erected by this house.

(See next page.)

In the basement is placed a powerful

Steam Pump of the "Knowles" Patent,

designed and built especially as a FIRE PUMP. The power is supplied from the boilers necessarily used in the building, or an independent boiler is erected. The Pump is so constructed as to

Start Quickly, and Work up to Full Capacity

when steam is at a low pressure on the boilers, as is usually the case in the night, or at other than business-hours.

ITS POSITIVENESS OF ACTION IS CERTAIN,

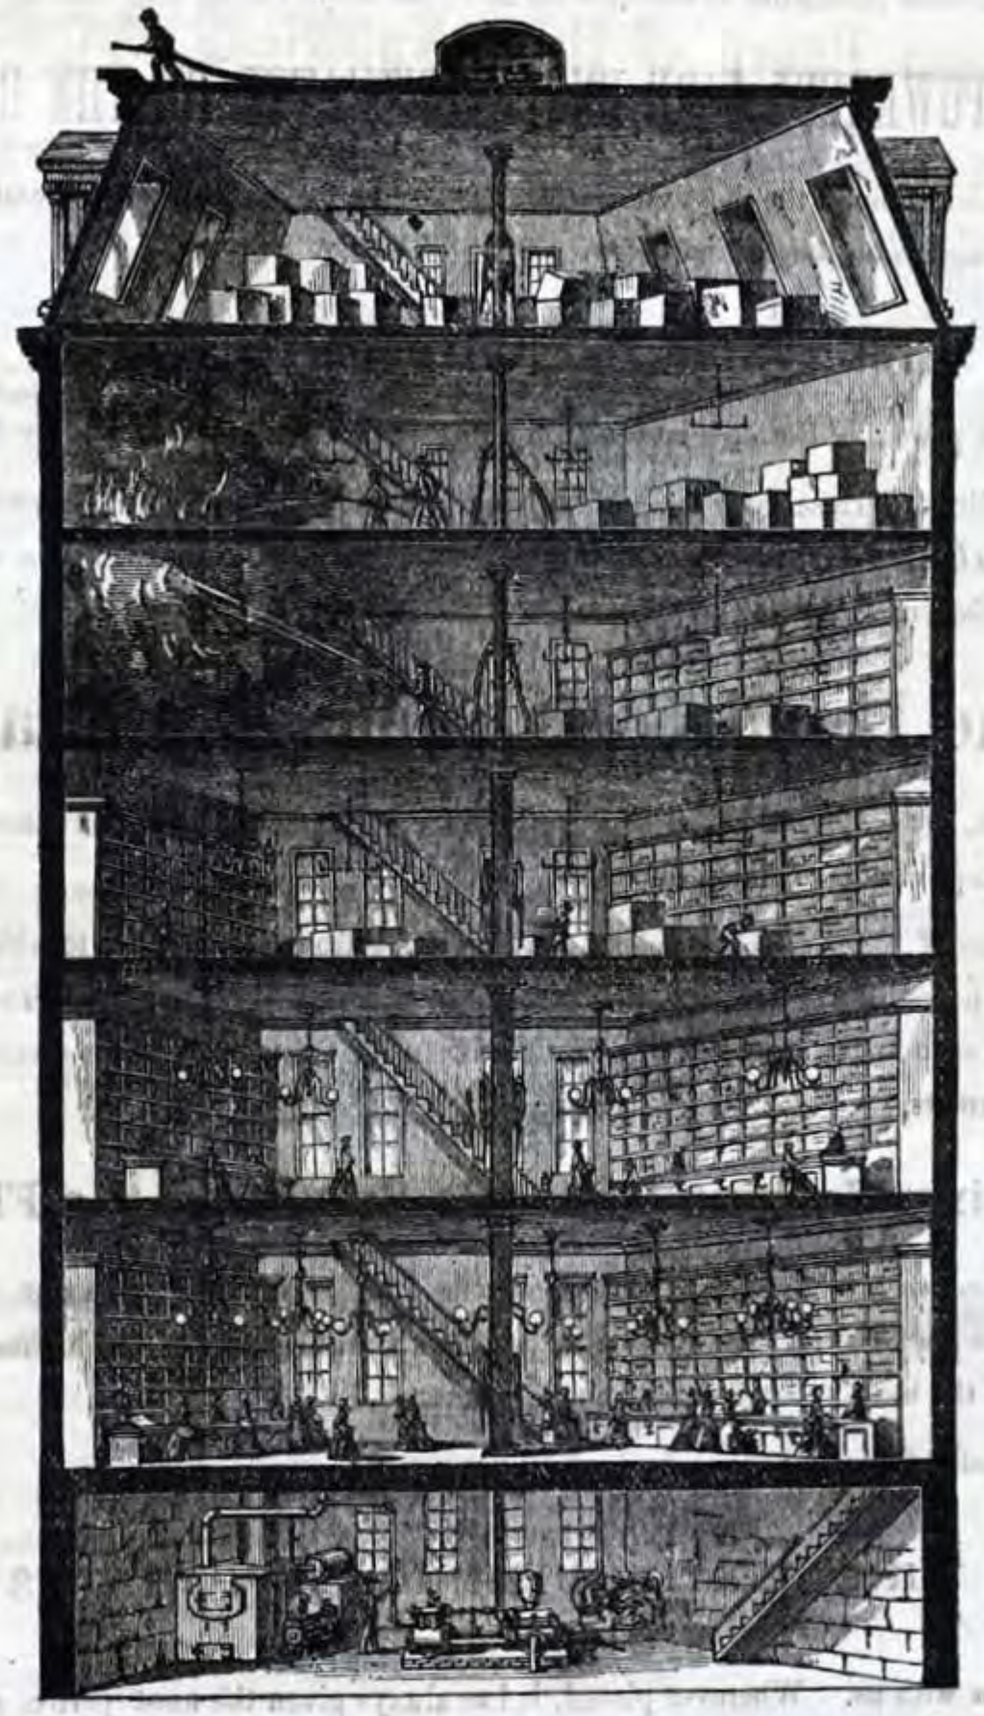
and its strength and durability all that the finest workmanship and best materials can secure.

From this Pump, which is of course the VITAL PART of the apparatus, a delivery or "stand" pipe passes up through each story of the building to the roof, the size of the pipe varying with the capacity of the Pump.

On each floor this pipe has one or more outlets, to which hose is attached

READY FOR INSTANT USE.

The valve between the hose and the stand pipe is arranged to be opened INSTANTLY by the simple raising of a lever, a feature combining great quickness with the certainty that IT CANNOT BE OPENED WRONG. Valuable considerations in time of excitement.



The Hose in apparatus erected by this firm is furnished with Play Pipes of the BEST MANUFACTURE; Spray Nozzles being always recommended for in-door use, as by them a large space is reached at once by the water.

We can give many instances where with such apparatus a fire has been

Fought Back and Extinguished,

even after having gained possession of almost an entire floor stored with combustible material.

(See next page.)

STATIONARY STEAM FIRE ENGINE

AND APPARATUS,

AS PUT UP IN STORES AND WAREHOUSES.

On the Roof, at the top of the Stand Pipe, are also attached connections for Hose, having the same excellence of attachments as on the floors below, thus making

A POWERFUL FIRE ENGINE SITUATED ON THE ROOF,

a point which, though the most vulnerable, CANNOT BE PROTECTED by the streams thrown from the engines on the ground below.

THE BOSTON FIRE FOLLOWED THE ROOFS,

and all the powers of Boston's most efficient Fire Department were unavailing to arrest it.

A few lines of Hose upon the roofs adjoining the building in which the fire originated, with the ***abundance of power*** which an apparatus of this kind gives, would have saved to Boston nearly

One Hundred Millions of Dollars,

as by them, not only would their own premises be covered, but powerful streams thrown upon the tops of the adjoining buildings.

A stream of water directed against any great fire from the distance to which the firemen are necessarily driven by the heat is by that same heat ***vaporized into steam,*** even before it reaches the fire it is meant to extinguish, and is carried back by the air currents,

Effecting Nothing Towards Subduing the Flames.

How necessary, then, to have some apparatus STATIONARY AND POWERFUL, which will continue to flood the roof and outside, as well as the inside floors of the highest building, even after the heat is too great for human endurance.

This mode of erecting

FIRE EXTINGUISHING APPARATUS

is NOT NEW with us. Wherever placed, it has always given the most perfect satisfaction. It is equally applicable to the high buildings of the city or the large manufactories and public buildings of the country, often

THEREBY CAUSING A REDUCTION IN RATES OF INSURANCE

equalling its cost.

(See next page.)

All the apparatus erected by this house is with a FULL GUARANTY of its RELIABILITY AND EFFICIENCY. The cost varying with the size and capacity.

We are happy to, at any time, furnish estimates on application.

On last page we give an illustration of an

Independent Stationary Steam Fire Engine,

being another of our styles of FIRE EXTINGUISHING APPARATUS, designed for large manufacturing or kindred establishments as are usually situated outside of the city.

With this STEAM CAN BE RAISED and a stream of water thrown upon the buildings

IN LESS THAN SEVEN MINUTES

from time of lighting the fire under the boiler. The capacity is only limited by the size of the machine.

We believe that our LONG EXPERIENCE, and the knowledge gained by

Repeated and Costly Experiments,

justify us in asserting the FULL SUPERIORITY of our FIRE EXTINGUISHING APPARATUS

Any of our various machines will be shown, and explanations of arrangement given, with pleasure at any time by us.

LAUNDRY STOVES.

Chilson's Patent

LAUNDRY STOVE.

THE

GREATEST IMPROVEMENT OF THE AGE IN HEATING SAD-IRONS!

1st. This Stove has internal SOLID CAST-IRON HEAT-CONDUCTORS ATTACHED TO EACH FACE-PLATE, which extend down into the fire-pot, thus bringing up the heat from the hottest portions of the fire to the centre of each face-plate, against which the irons are placed.

By this improvement the irons are heated in less than one-half of the time formerly required, and at a great saving in fuel, and the handles of the irons are not overheated, as in other stoves.

2d. The faces of the irons are prevented from being burned and made rough, and are always kept bright and smooth.

3d. There is a hole in the top for boiling water, starch, &c.

4th. The Stove is lined, to prevent the room being uncomfortably heated in warm weather.

5th. The whole thing has been got up in my best style of mechanical workmanship, and in a very substantial and durable manner.
